

Invitation

“Gå-hjem-møde” about global wind energy shipping and logistics
March 20, 2014 at 16:00 pm at the DONG Energy office premises in Gentofte

Strong focus is being put into reducing the levelized cost of energy for wind power, both onshore and offshore. Compared to traditional fossil fuels like oil and coal, the offshore wind arena is the most complex and costly which means that the challenges and issues faced here by the industry require a lot more focus and diligent efforts by all supply chain constituencies. One significant area which deserves additional focus is shipping and logistics and you are hereby invited to the first in a series of 7 “gå-hjem-møder” over the coming years, focusing on different shipping and logistics topics for wind energy.

Organizers: The Danish Maritime Foundation and Aalborg University Copenhagen

Venue: DONG Energy, Nesa Allé 1, 2820 Gentofte, Denmark

Timing: Thursday, March 20, 2014 at 16:00 – 17:30 pm

- Program:**
1. Opening and welcome by DONG Energy
 2. Review of wind shipping and logistics environment incl. challenges of DONG Energy
 3. Global shipping / logistics wind industry challenges from Aalborg University research
 4. Panel discussion about a “hot” offshore wind shipping and logistics “bottleneck”
 5. Questions about wind shipping and logistics from the audience to the expert panel

Expert panel:

Participation: Free-of-charge, first-come-first-serve (maximum capacity: 100 people)

Registration: Please register by sending an e-mail to anmah@dongenergy.com in English with name, company name, and phone number
